INTRODUCTION

Ask the land.
Make with your hands.

Observe, repair and create at a shared farm in Goyang, South Korea.

---

01 / OBSERVE

Read the farm’s less visible changes.

Put photographs and impressions alongside readings of light, temperature and soil.

02 / REPAIR

Think of the next person using a tool.

Explain where a tool is, its condition and how it can be used again.

03 / CREATE

Express light through the folds of paper.

Explore structure, material and energy to give your question a physical form.

FIRST SEASON / PLAN

12 people

12 weeks · KRW 360,000 per person

Six three-hour sessions, every other week. Designed around three teams of four.

• Planned inclusions: six sessions, basic shared tools and consumables, documentation guidance

• Outside the plan: personal equipment, specialist materials, meals and transport

• Membership covers scheduled sessions, not unrestricted access to the premises.

• Start dates, facilitators, detailed support and refund terms will be published before enrolment.

Our shared principles

Our operating model does not rely on property rental revenue.

You choose whether to share your work, photos and records.

Twelve is the planned capacity. No members have been recruited yet.
